

Injection Molder

About	Plastic injection molders inject hot plastic under high pressure into mold cavities to create solid parts. The Garage has a plastic injection molder for small injection molding production runs with manual part removal. It can inject 100 mL of plastic at temperatures up to 430°C.
Category	Plastics Fabrication
Location	Back Room
Brand /Model	Morgan Press Model G-100T
Status	AVAILABLE
Materials	• Polypropylene (PP) • Polyethylene (HDPE & LDPE) • Polycarbonate (PC) • Polyurethane (TPU) • Non-toxic thermoplastics

Standard Operating Procedure

Training

Injection molder training begins with an introduction to injection molding. After basic operation is understood, training expands to explore mold design & making, and advanced materials. The injection molder training flowchart outlines the training fields and levels.
